Its capacity to capture both the finest dust and gravel makes it the perfect sweeper for all heavy-duty industry applications, public areas and loading/unloading areas. The Beta 1100 industrial sweeper has the best features of machines in its category: a high-capacity container, high power, high sweeping capacity and a powerful suction system. In addition, the Beta 1100 ride-on sweeper can be equipped with a Gore® filter, a technology that achieves the best filtering results thanks to improved dust control down to 1 micron, better suction and easy, low-cost maintenance.

Strengths

- Mechanical suction filtering sweeping system
- Water-cooled engines suitable for long shifts and/or very hot climates
- Low maintenance required as all functions are hydraulically operated
- No electronics present
- Belt-less turbine that does not require maintenance
- No tools required to replace the central broom
- Easy access to the filter for inspection and cleaning

Technical Data

Minimum Seeping Width (mm)	750
Maximum weeping Width (mm)	1440
Water Container Capacity (L)	220
Hourly Performance (m2/h)	10080
Filtration PM10 (%)	99
Power Supply	Electric 36 V
